PB-23 Panic Button

Summoning Help with One Button

The PB-23 panic button is designed for the user to summon help with one simple button press when an emergency arises. In a critical situation such as a fall, acute medical problem, fire, or burglary, the user can quickly identify the big red button and activate the device to report an alarm to monitoring personnel.

The effective security solution provided by the PB-23 has residential and commercial applications. It can be installed in the homes of elderly individuals to make their independent living safer. It can also be used in gas stations, convenience stores, hospitals, or other establishments where employees have to work during late hours. When pressed in times of distress, the button triggers a silent alarm to bring emergency assistance to the user.

Its LED indicates reception of the control panel's signals. The panic button transmits supervisory and low battery signals to the security and smart home panel to ensure its proper operation at all times.

- **Large HELP button for quick activation**
- **Waterproof**
- **Residential and commercial applications**

Features

- Big red HELP button for quick identification and activation
- Wireless allows for mounting on wall or placed on flat surface
- Long battery life
- Low battery indicator
- Periodic supervisory signals check system integrity
- IPX6 Water Resistant Rating
- LED indicator
- Simple and modern design

Specifications

Frequency	433 MHz
Power Source	3V, CR123 Lithium battery x1
Battery Life	Up to 8.9 years*
Operating Temperature	-10°C to 45°C
Operating Humidity	Up to 85% non-condensing
Dimensions	85mm x 85mm x 22mm

**Battery life varies by use and configuration.*
